Bench

design: David Parshad, Inscape Design Studio

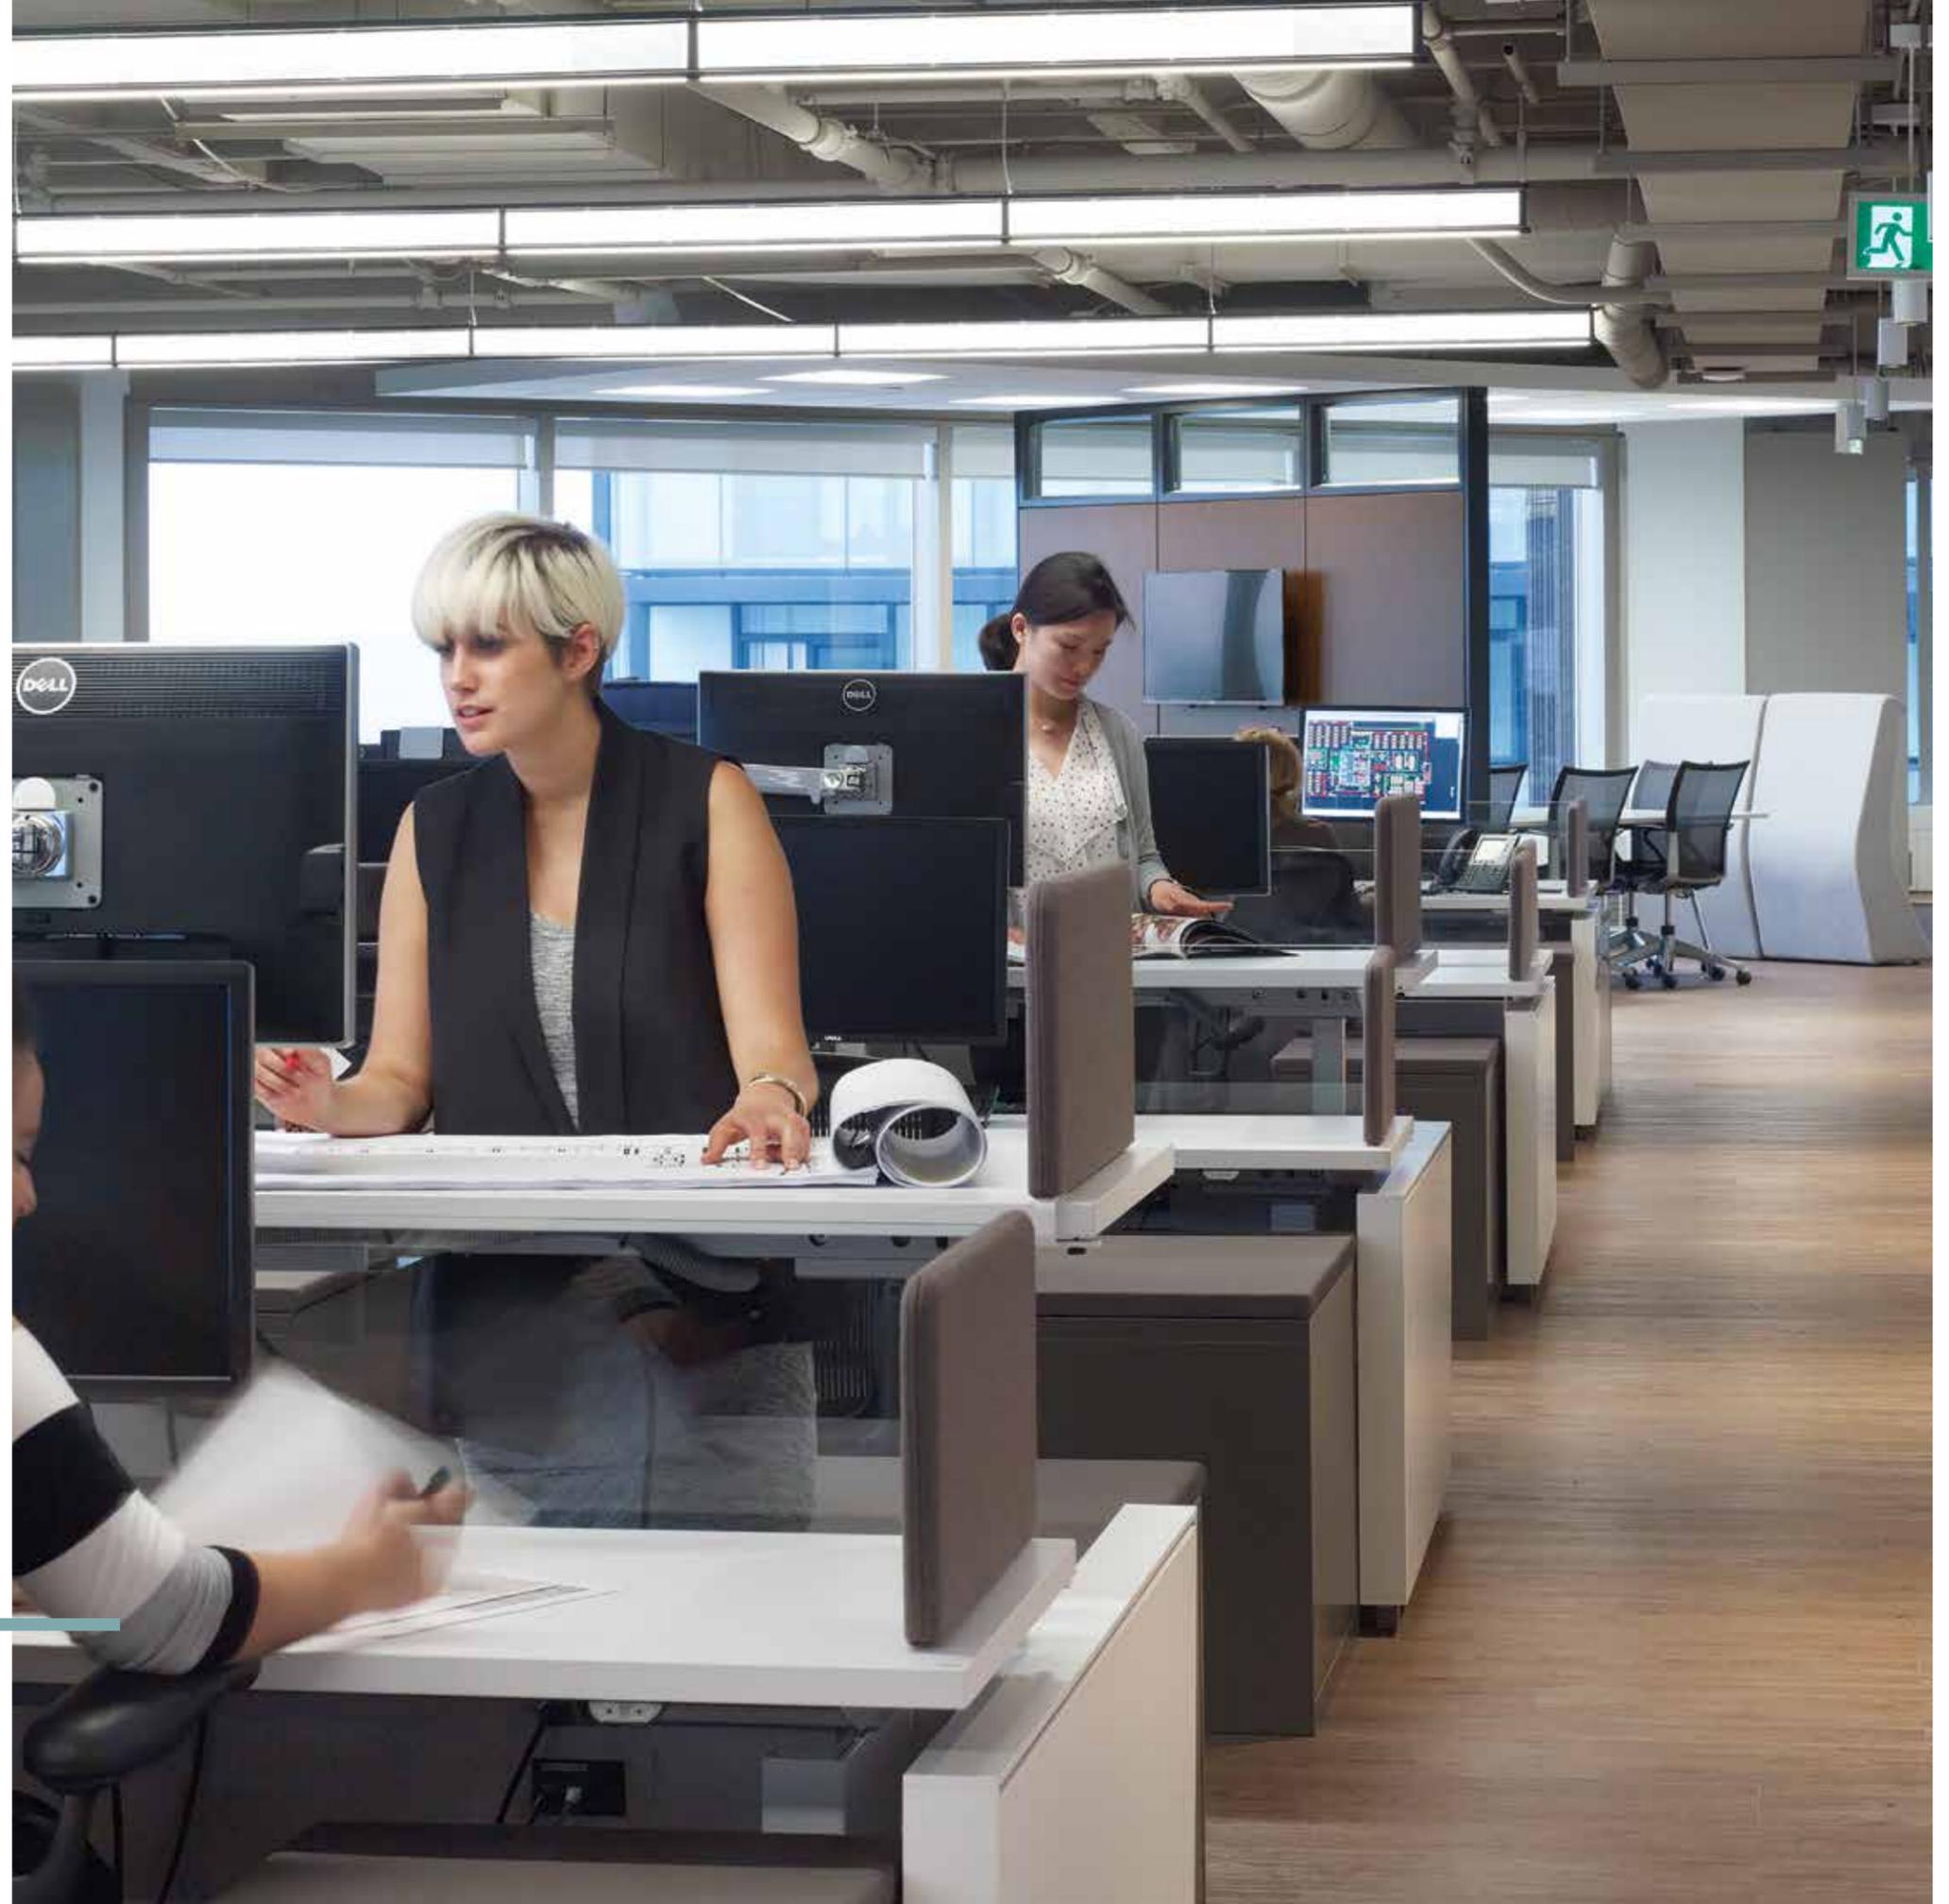

The smarter solution to the open office

Bench is a customizable, scalable desking system that addresses the diverse work modes of today's office.

Our Bench encourages collaboration while supporting users requiring visual and acoustic privacy, and even full panel solutions if necessary. This flexibility allows for personalized workspaces that help keep workers happy and productive.

delight users

Personalize your workspace with storage and privacy options, accessories, and height-adjustable worksurfaces.

More options for personalization

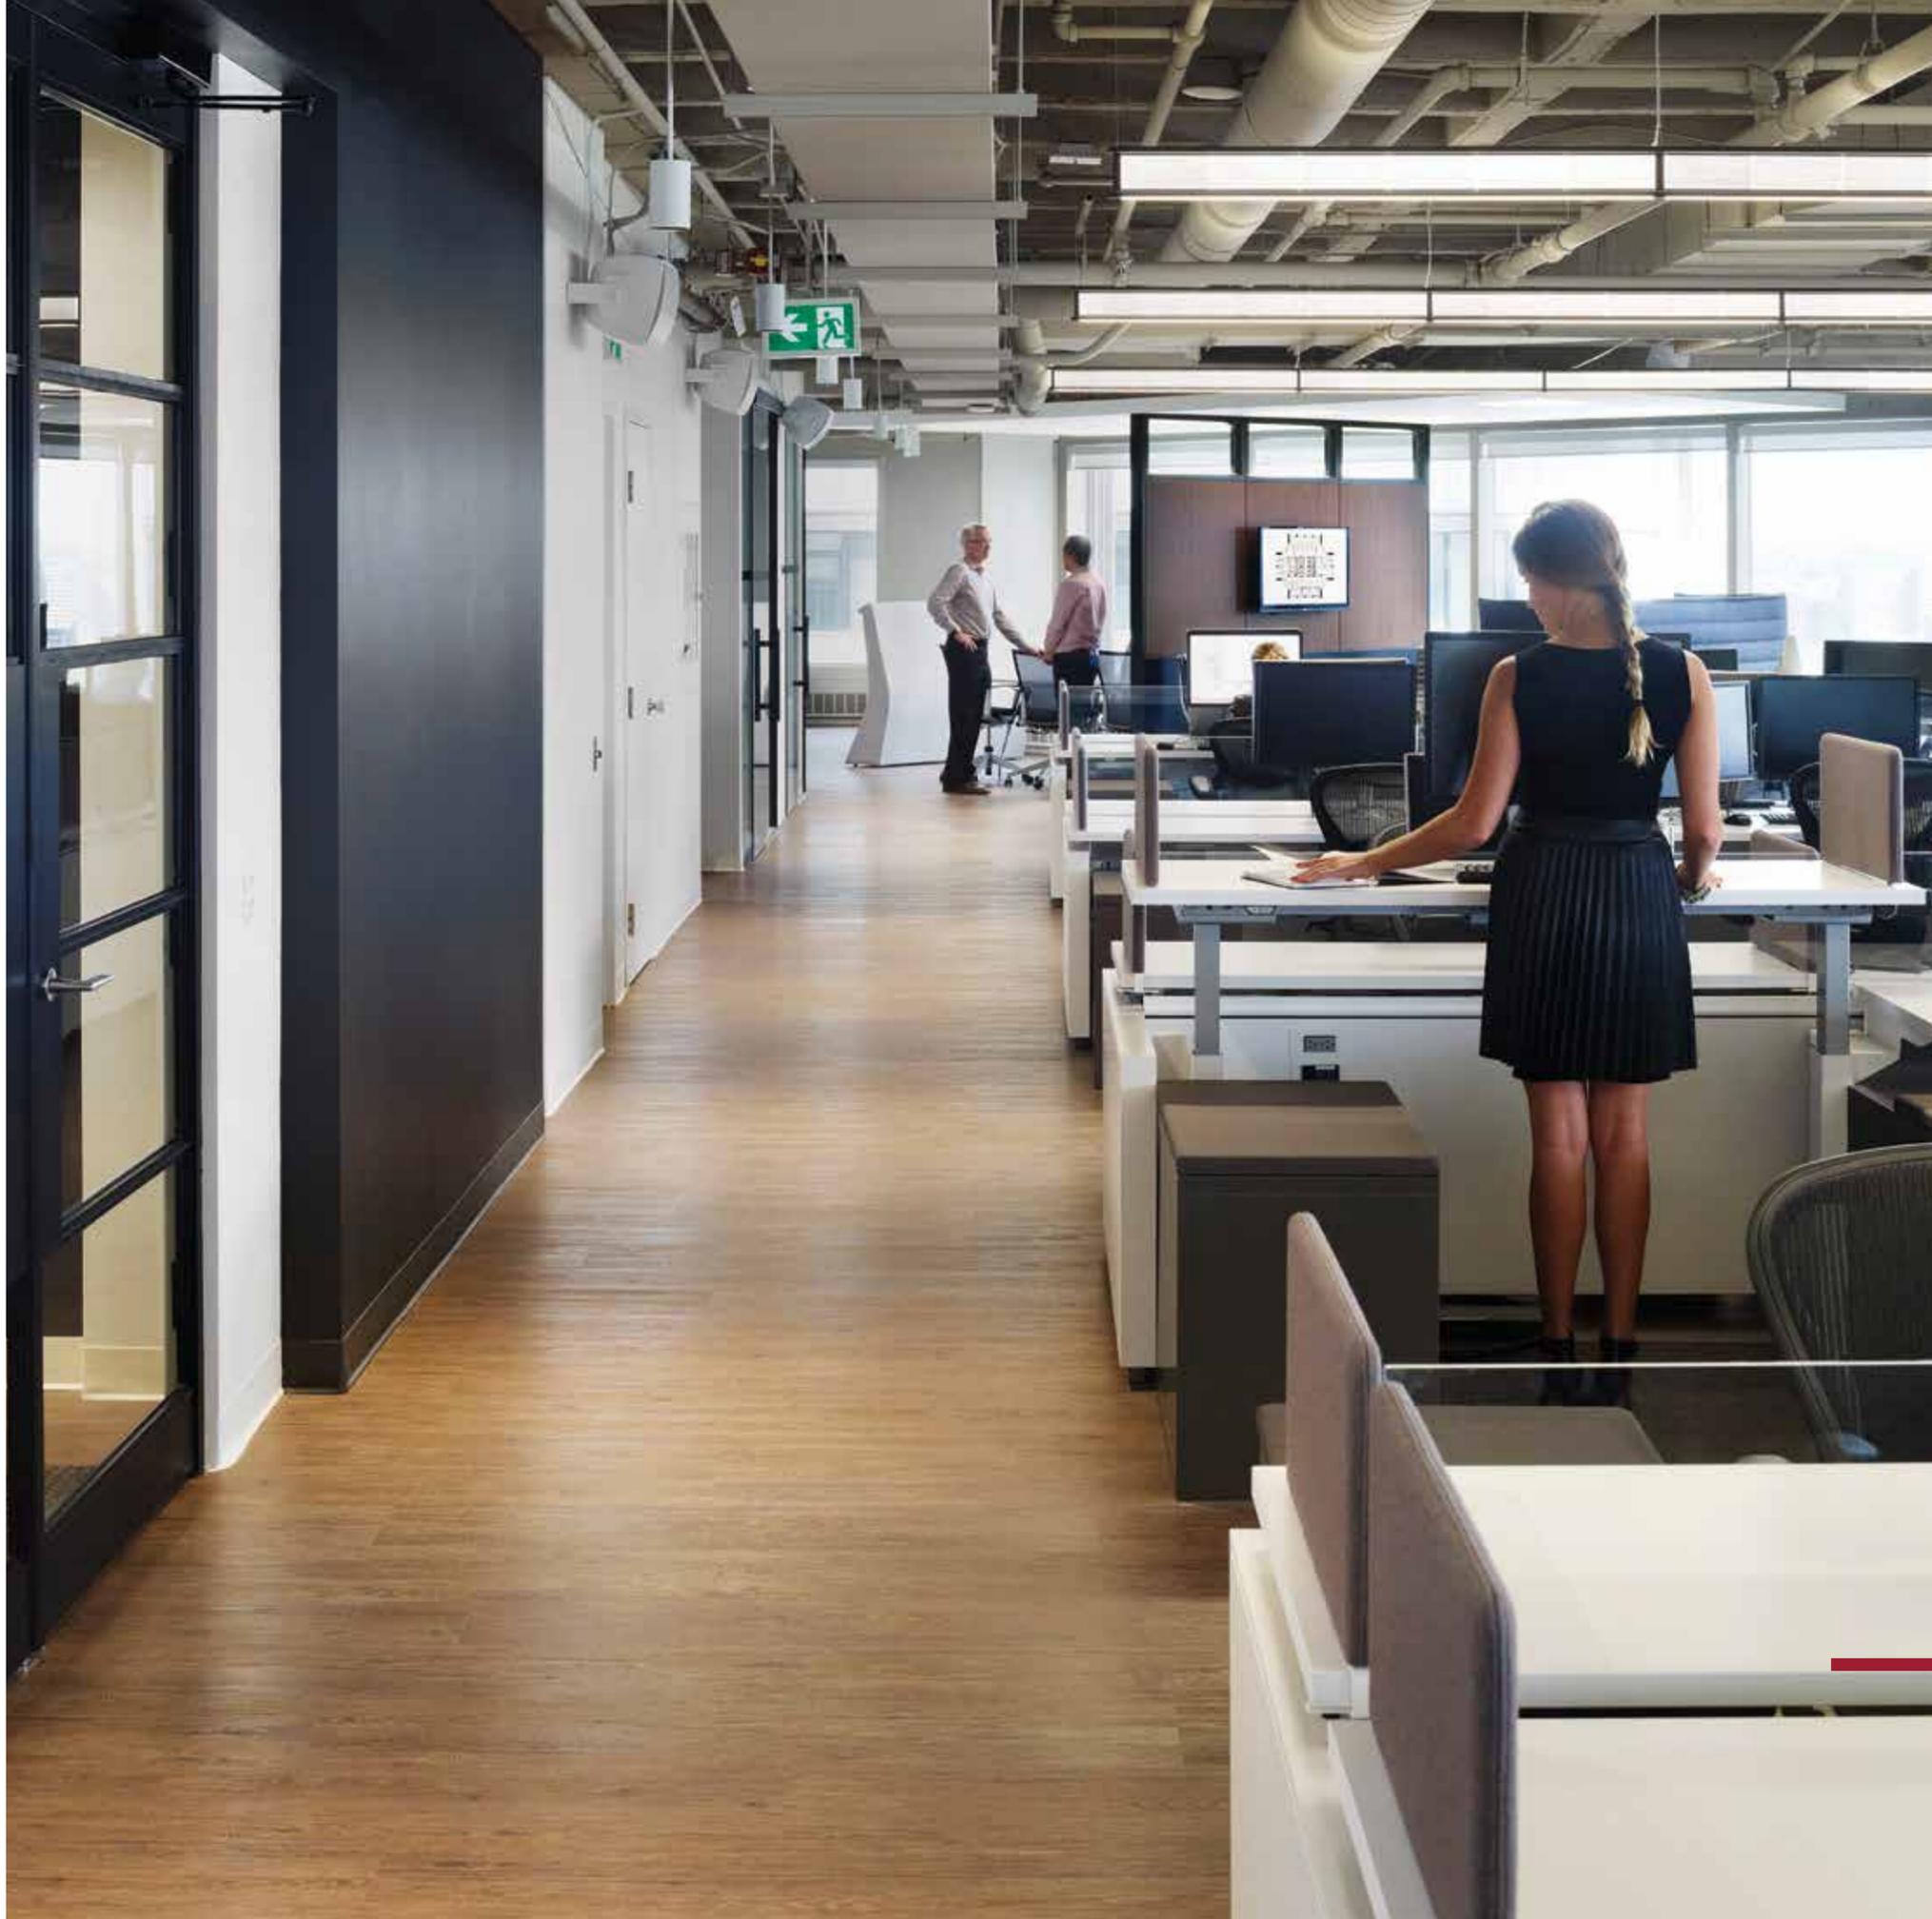

Minimal and sleek or technology-intensive? So versatile, Inscape Bench can go from simple to fully featured and back again at any time.

We offer more options for customization than any other bench available, including hanging storage units, privacy glass, planters, fabric screens, electrified storage and more. Define boundaries, add privacy, encourage collaboration – it's up to you.

empower technology

Choose from four convenient options for power/data access. Plus, with our Twin-Bin solution, mobile workers can plug in a device and lock it securely while away from their desk.

Stand for wellness

Improve comfort, satisfaction and productivity with height-adjustable worksurfaces. Inscape offers superior flexibility for clients unsure about sit/stand desking. Unlike other benches on the market, we offer the option of adding sit/stand (pneumatic or electric) mechanisms to Inscape Bench at any time, providing true flexibility of planning.

Healthier work surfaces

Nuform is our exclusive worksurface, a durable, beautiful and ergonomic alternative to traditional laminate. Available in a tapered edge for a comfortable sloped surface that eliminates pressure on wrists. Nuform's seamless edge features a clean aesthetic with no edge banding where bacteria can penetrate and flourish.

delight users

Standing for just 5-10 minutes every hour can reduce fatigue and reduce the risk of major diseases.

Ready for change

Like other Inscape products, Bench features inherent flexibility to address evolving needs – peace of mind for clients unsure of how changing workplace trends will impact their business.

More or less

A stack-on frame can be added to the bench spine to increase privacy or accessorization, and can be removed at anytime with no downtime.

Add a sit/stand desk after installation

Inscape Bench provides the unique option of adding height adjustability after installation – for any station within the cluster.

Flexible privacy

Privacy options include Cove, a screen that is easily moved by the user whenever and wherever they wish to block visual distractions and signal the desire for privacy.

Create a meeting place

Swap out a workstation for a casual collaborative zone.

design for sustainability

Used on the interior of storage cases and frame components, Eco Black paint diverts more than five tons of waste from landfills annually.

The greener choice

The inherent flexibility of Bench enables the product to address evolving workspace needs, providing an investment that will pay off for years to come.

Our Bench is level® 3 and Greenguard certified. Our Nuform worksurfaces are FSC® certified, and feature 98% recycled content MDF. Our materials include 100% recyclable steel components and recyclable fabrics.

Guiding principles to product design

delight users

Thoughtful details keep people happy and productive.

empower technology

Convenient, flexible access to technology and power makes it easy to share information.

foster agility

Smart products let people easily customize and adapt their space as needs change.

design for sustainability

Responsible choices matter — from beginning to end, and over again.
